

# BROWNFIELDS GRANT WORKSHOP: UNDERSTANDING FY 2012 GUIDANCE

As part of EPA's priorities, Cleaning Up Our Communities, the Brownfields program is working on promoting the redevelopment, revitalization, and reuse of underutilized properties. Cleaning up and reinvesting in these properties not only ensures public health but provides numerous economic, environmental and social benefits. EPA's Brownfields Program provides a series of funding opportunities to assist communities on preparing properties for redevelopment.

EPA's Brownfields Program provides direct funding for brownfields assessment, cleanup grants and revolving loans. To facilitate the leveraging of public resources, EPA's Brownfields Program collaborates with other EPA programs, other federal partners, and state agencies to identify and make available resources that can be used for brownfields activities.

To learn more about the FY 2012 Guidance and funding opportunities, EPA Region 2 will be conducting regional Brownfields Grant Workshops. The workshops are designed to assist local governments, tribes, and non-profit organizations to better understand Assessment, Cleanup, and RLF grants.
